

GRIT CHAMBER- HORIZONTAL SEDIMENTATION TANK
MODEL: CHC-DES

Function:

- Removal of sand and particles of high density by settling phenomenon.

Characteristics:

- Manufactured by Salher; Model CVC-DES.
- Made of Fiberglass Reinforced Polyester (FGRP), with orthophthalic resin.
- Highly efficient separation of the sand and particles thanks to its large separation surface.
- Oils and greases removal through manhole in FGRP.
- PVC outlet and inlet pipes. Connection pipe located on the manhole to install the air vent (or possibility to install it in any other place).
- Option: sand and solids level detection alarm.
