

RAIN WATER TREATMENT AND REUSE
REF: RAP**Function:**

- Rain water filtration and storage for a watering reuse.

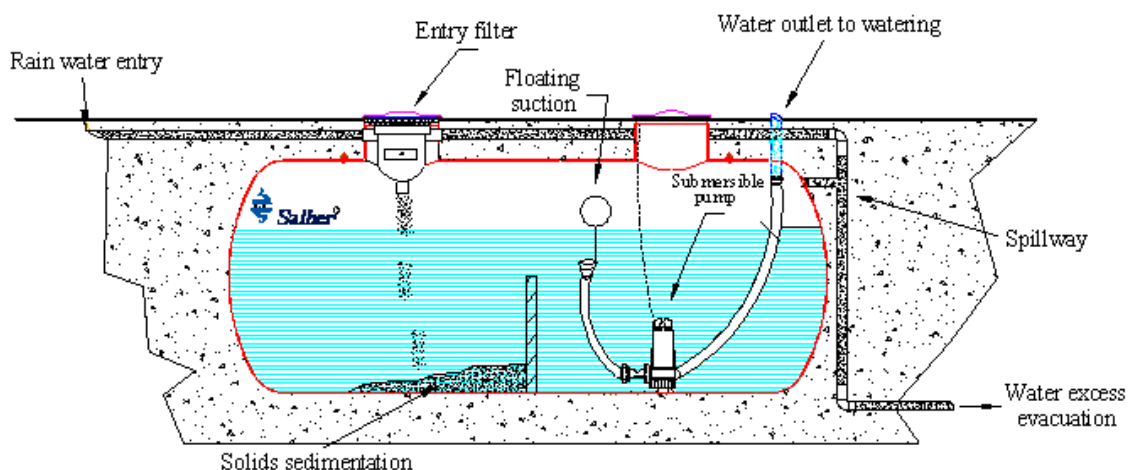

Characteristics:

- Storage tank made in FGRP (Fiber Glass Reinforced Polyester) to above ground or underground installation.
- polyamide filter with a high resistance against high pressure and/or impact.
- Jet deflector at the storage tank entry.
- Floating suction to extract the cleaner water (optional: pump)
- Submersible pump and/or high pressure submersible pump for sparge watering.
- **Electric board to protect, control and operate (optional)**

RAIN WATER COLLECT FOR ABOVE GROUND INSTALLATION
RAP 01

CAPACITY [litres]	Ø [mm]	HEIGHT [mm]
1.000	1.000	1.470
1.500	1.200	1.560
2.000	1.200	2.007
2.500	1.400	1.905
3.000	1.400	2.230

RAIN WATER COLLECT FOR UNDERGROUND INSTALLATION
RAP 02

CAPACITY [litres]	Ø [mm]	LENGTH [mm]
4.000	1.400	2.880
5.000	1.700	2.540
6.000	1.700	2.980
7.000	1.700	3.420
8.000	1.700	3.860
9.000	1.700	4.300
10.000	2.000	3.580
11.000	2.000	3.890
12.000	2.000	4.214
13.000	2.000	4.530
14.000	2.000	4.850
15.000	2.000	5.170
20.000	2.000	6.760
24.000	2.500	5.380
25.000	2.500	5.590
30.000	2.500	6.600
35.000	2.500	7.610
40.000	2.500	8.640

* Submersible centrifugal pumps with high pressure, 0,6 KW automatic single-phased 200V 50 Hz. For other model, consult us.
