

**OIL AND HYDROCARBON LEVEL ALARM AND SAND AND SOLIDS LEVEL ALARM
 USING SOLAR CELLS AND ALERT SYSTEM VIA GSM
 MODEL: SolarSET**

Function:

- Oil and hydrocarbon maximum level detection in water.
- Sand and solids maximum level detection.

Characteristics:

- Manufactured by Salher, Model SolarSET.
- Ideal for isolated areas without source of energy. Supplied thanks to photovoltaic modules and energy economy system.
- Oil level detection probe SET DM3, operation with conductivity system.
- Sand and solids level detection probe.
- Junction box LJB2, allowing an extension of the cable. Protection level IP67.
- Remote control unit operated with mobile phone.
- Sending message system: alarm and system state.
- Programmable via SMS.

- ① Solar cells
- ② Labcom 200 Communication Unit
- ③ OilSET-1000 Hydrocarbon Alarm
- ④ 12 V/7 Ah Battery
- ⑤ Button switch
