

MANHOLE EXTENSIONS
MODEL: CVA-P

Salher provides a wide range of accessories for better operation of devices.

- Manhole extensions to install tank deeper underground, to save quotas or to help it stand freezing temperatures or other exterior agents.
- These devices are made of Fiberglass reinforced polyester (FGRP), as all equipments manufactured by Salher.
- These extensions are easily and swiftly to install, it's just to match the pieces with the sides and to accumulate a number of modules to reach the required height.
- Salher provides a wide range of available lengths and diameters for each one of the different devices.
